

5G Communication Device

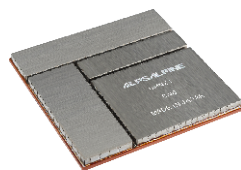

Long-life 5G communication device resistant to heat, humidity and vibrations

Alps Alpine Technology Ensuring a Reliable Communication Performance

- Expertise in enhancing reliability built up in the automotive domain
- Temperature compatibility with proven automotive performance: -40°C to +85°C
- CAE thermal analysis and simulation use and evaluation
- Expertise in reliable communication development based on public 5G modem development record
- RF evaluation using in-house EMC/anechoic chambers
- Robustness field testing on in-house course

5G Module for Automotive Use

Local 5G Terminal
